EXPERIENCE

Summer Intern

May 2023 - June 2023

HighRadius

Remote

- Engineered an AI-powered invoice management system using JDBC SQL and React for seamless backend-frontend communication and user-friendly interface.
- Integrated machine learning algorithms into the system to forecast order amounts and enable data-driven financial decision-making.
- Tech stack used: SQL for database, React for front-end, ML models for forecasting.

PROJECTS

WHATSAPP CHAT ANALYZER Implemented a WhatsApp Chat Analyzer using Streamlit and Python libraries like Pandas and Matplotlib to develop a web app providing insights on chat conversations by aggregating message times and analyzing monthly chat patterns and trends. ([Try it here](#))

MEMORIES Developed the "Memories" web application using MERN stack technologies including React, Node.js, Express and MongoDB to provide users a seamless and user-friendly platform with authentication, responsive design, interactive features, and efficient backend functionality for sharing and cherishing life events.
